5-YEAR WARRANTY TERMS AND CONDITIONS

Laura Dental Center provides a 5-year material warranty for crown and veneer treatments, subject to the terms, conditions and limitations set out below.

WARRANTY TERMS & CONDITIONS

To maintain the validity of your warranty, you are required to follow the care, maintenance and follow-up recommendations provided by Laura Dental Center and your treating dentist throughout the warranty period.

You must maintain **appropriate oral and dental hygiene** and follow the daily care instructions provided by your dentist.

You should attend r**egular dental examinations and annual routine check-ups** as recommended by your dentist to ensure that your oral health and dental treatments are appropriately monitored.

You must follow all **aftercare instructions** provided following surgical or prosthetic treatment.

Where a protective plaque or night guard has been recommended, you must **use it regularly and as instructed by your dentist.**

You should inform your dentist of any significant changes in your general health or medical condition that may have an impact on your oral or dental health, including conditions such as diabetes, depression, epilepsy, osteoporosis or other relevant medical conditions, as well as during treatments such as chemotherapy.

You should consult your dentist before using any **medical or herbal supplements** that may adversely affect your teeth or oral health.

You should avoid **smoking** where this may adversely affect the treated teeth or contribute to dental complications.

You should take appropriate precautions when participating in **contact sports or other physical activities** that may result in dental trauma or injury.

You must not have **jewellery, piercings or other foreign substances** applied to your teeth, whether temporarily or permanently, without first consulting your dentist.

You must maintain and care for any **removable full or partial prostheses** in accordance with your dentist's instructions. Damage, breakage or cracking caused intentionally or accidentally by the patient is not covered by the warranty.

If you require any treatment, adjustment or intervention involving the treated teeth, you must **contact and consult Laura Dental Center before receiving treatment from another dentist or dental clinic.** Treatment or intervention performed elsewhere without prior consultation with Laura Dental Center may affect the validity of your warranty.

If **root canal treatment or tooth extraction** becomes necessary for teeth supporting or located beneath crown or bridgework, such procedures are considered separate treatments and are charged in accordance with the current price list.

Where a clinically recommended treatment is considered necessary for the successful completion or maintenance of your treatment, including but not limited to root canal treatment or gingival contouring, you are expected to follow your dentist's recommendations. If you choose to decline such treatment, Laura Dental Center cannot be held responsible for any resulting complications or outcomes.

Additional treatments that may become necessary following or during diagnostic X-rays or clinical assessment, including root canal treatment, tooth extraction, fillings or other procedures, are considered separate treatments and are not included within the warranty. Such treatments will be charged separately in accordance with the current price list.

Where the **colour, size or shape** of your dental treatment has been selected during the preparation stage and approved by you with your written consent, Laura Dental Center cannot be held responsible for subsequent dissatisfaction with the selected colour, size or shape.

You must fulfil all **payment obligations relating to your treatment** in order to maintain the validity of the warranty.

IMPLANT WARRANTY CONDITIONS

If an implant becomes unusable during the **healing period**, a replacement implant may be provided at Laura Dental Center free of charge. Any additional procedures or materials that may be clinically required, including **bone grafting, membrane placement or sinus lifting,** are considered separate treatments and are subject to additional charges.

If an implant becomes unusable after the healing period, the warranty applies only to the implant itself. Any crown, bridge, prosthesis or other restoration placed on the implant is outside the scope of the implant warranty.

All warranty-related corrective procedures covered under this warranty must be **performed exclusively at Laura Dental Center.**

TREATMENTS NOT COVERED BY THE WARRANTY

Due to the nature and clinical characteristics of the following treatments, **they are not covered by the Laura Dental Center warranty:**

- Temporary Crowns / Bridges / Dentures
- Root Canal Treatment
- Composite Bonding
- Composite Fillings
- Night Guards / Gum Shields
- Teeth Whitening / Bleaching

Travel and Accommodation

Flights, accommodation and associated travel expenses are not included within the warranty coverage.

GENERAL WARRANTY CONDITIONS

The warranty applies only to the treatments and components expressly covered by the applicable warranty and is subject to the patient's compliance with the treatment, aftercare, maintenance and follow-up requirements provided by Laura Dental Center and its dental professionals.

The warranty does not extend to separate or additional treatments that may subsequently become clinically necessary or to treatments performed by another dental clinic or dentist.

By accepting treatment at Laura Dental Center, the patient acknowledges and agrees to comply with the above warranty validity conditions.
